Examples of Success Stories

Air Pollution Control Agency	An agency requested specialized driver training for their drivers, emphasizing defensive driving techniques. Chubb Risk Consulting customized a training session that included hazard recognition, crash avoidance strategies, fatigue management, and an overview of crash statistics. The program also featured behind-the-wheel commentary training. This initiative served both as onboarding for new hires and refresher training for existing drivers, helping to reduce violations and crashes, ultimately improving the agency's loss ratio.
Trucking and Logistics Companies	Two renowned companies decided to merge, bringing together their strengths and resources. Understanding the importance of a robust fleet safety program in their new venture, they turned to Chubb Risk Consulting for expert guidance. The team conducted thorough individual fleet risk assessments for each company, meticulously analyzing their existing safety protocols and practices. The assessments provided critical insights and actionable recommendations that paved the way for a smoother integration of their fleet safety programs. By collaborating with Chubb, both companies are in the process of developing a centralized approach to safety management, ensuring that best practices were adopted across the board. This strategic integration not only streamlined operations but also significantly enhanced their overall safety measures.
Logistics Company	A logistics company recognized the critical need for robust safety measures to protect its employees and assets. In response to the increasingly concerning issue of active shooter situations, they sought the expertise of Chubb Risk Consulting to evaluate the standard operating procedures (SOPs) proposed by their Commission Security Team. The team's thorough review of the SOPs revealed opportunities for improvement and enhancement. By collaborating closely with the logistics company, they recommended a more comprehensive and effective response strategy tailored to potential active shooter scenarios. This newly refined approach not only addressed immediate safety concerns but also fostered a culture of preparedness and vigilance within the organization. The successful implementation of this enhanced response strategy underscores the logistics company's commitment to safeguarding its workforce and reinforces its position as a leader in industry safety standards.

Lower Your Risk Today with Chubb Risk Consulting
